

# Acrylite® FFD

LIGHT DIFFUSING ACRYLIC SHEET

*Light years ahead of any pigmented acrylic or polycarbonate!*

ACRYLITE® FFD acrylic sheet offers superior light transmission and diffusion properties for energy saving light fixtures.

This specialty acrylic sheet product offers a frosted appearance without light inhibiting pigments. The unique formulation of ACRYLITE FFD sheet provides greater than 85% light transmission on a 3mm thick, clear frosted lighting panel, while offering great light source hiding power.

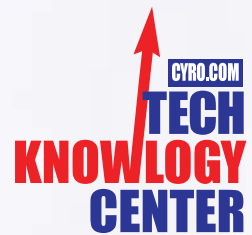

- Easily formed
- Saves money by increasing lumen output per fixture
- Resists fingerprinting
- Easy to clean

Color	Size	Thickness	%Transmission
<b>Clear Frosted 0918-8</b>	49" x 97"	3.0mm	86%
		4.5mm	82%
		6.0mm	78%
<b>White 0149-5</b>	49" x 97"	3.0mm	51%
		4.5mm	51%
		6.0mm	51%

*The Georgia World Congress Center in Atlanta installed large custom fixtures utilizing ACRYLITE® FFD Light Diffusing Acrylic Sheet to shed light on the 1.4 million sq. ft. expansion.*

*Custom pylons (above) give off light from the base to the top and provide a more inviting appearance than traditional pole-mounted lights.*

*ACRYLITE FFD sheet evenly diffuses light in the ballroom fixtures (below) creating the illusion of a ceiling of light.*
