

## *Specialty Acrylics for Preservation, Security & Visual Elegance*

Protecting treasured art and artifacts, paintings, prints, drawings, works on paper, historic documents and memorabilia at the finest museums throughout North America.

# Acrylite® OP-2

ACRYLIC SHEET

*Filters 98% of damaging UV light,  
guaranteed defect free*

# Acrylite® GAR OP-2

ACRYLIC SHEET

*Combines UV-filtering with  
abrasion and chemical resistance*

- Excellent optical quality and clarity
- Half the weight of glass. Many times more shatter resistant.
- Edges can be mitered and cemented for strong nearly invisible joints
- Meets demanding museum standards for conservation glazing

ACRYLITE® OP-2 acrylic sheet filters out 98% of the UV-range of light (200-400 nanometers) and offers excellent light transmission in the visible range between 400 and 700 nanometers. ACRYLITE OP-2 sheet's proprietary technology eliminates the objectionable "yellow tint" evident in other UV-filtering products. Easily fabricated, it can be thermoformed, cold-formed, screen printed and painted. Guaranteed against defects or your money back.

ACRYLITE® GAR OP-2 acrylic sheet combines abrasion and chemical resistance with these same UV-filtering properties to minimize marring caused by public contact and frequent cleaning. Coating is available on both sides or one for economical savings.

**Standard product offering. Custom sizes and gauges are available upon request.**

**Sizes:** 48" x 72", 48" x 96" and 72" x 96"

**Gauges:** .080"(2.0mm), .118"(3.0mm), .177"(4.5mm),  
.236"(6.0mm), .354"(9.0mm) and .500"(12.7mm)

*Innovative Specialty Acrylics*

*Both framed pieces above were exposed indoors to two hours of direct sun daily for two years. The artwork at the bottom was framed with glass. The artwork at the top was framed with ACRYLITE® OP-3 conservation acrylic sheet.*

*The World's Finest Conservation Glazing isn't Glass!*

# Acrylite®

ACRYLIC SHEET

ACRYLITE® acrylic sheet conservation products give you all the protection of conservation glass, and more. The ACRYLITE OP-3 sheet conservation grades protect cherished art, photographs and memorabilia against fading and yellowing caused by UV light. Abrasion resistant ACRYLITE AR OP-3 conservation sheet offers the same UV protection, and it also resists scratching and the dulling effects of alcohol and ammonia cleaners. ACRYLITE sheet is known for its outstanding optical quality and clarity. At half the weight of glass and many times more shatter resistant, it is the perfect choice for framing treasured art and artifacts.
