

INDUSTRIAL PARTITION

Aluminum frame with polycarbonate panel insert

The manufacturing and assembly areas are often in a constant state of fluctuation as employees move from one workstation to another. This continually movement makes static barriers, used to support social distancing, impractical and ineffective. The use of a face mask or face shield can help the social distancing cause, but can also be uncomfortable during the warm summer months in work environments that are not temperature controlled. Total Plastics has developed a single panel industrial partition, a simple, portable, low profile and safe solution to support employee safety during the COVID-19 outbreak.

Constructed with an aluminum frame and clear polycarbonate panel, our industrial panels are lightweight and easy to move around from one work area to another. Equipped with locking casters, the partition will also stay in one place.

Total Plastics, Int'l, is a stocking distributor of a variety of thermoplastic substrates and profiles. Headquartered in Kalamazoo, MI, TPI offers 15 stocking locations allowing us to rapidly expedite your material needs. Not only do we stock a broad selection of material and profiles, we set ourselves apart with our value-added services including CNC cutting, routing, milling and turning.

Standard Product Specifications

Standard Frame Size	36 x 80 inches (82 inches tall with casters)
Weight	Approx. 25 lbs. (including material inserts)
Frame Colors	Gray Aluminum Bars
Panel Color	Clear Polycarbonate

Features & benefits

- Polycarbonate is clear like glass and virtually unbreakable, making it perfect for work areas where debris is common.
- Lightweight and easy for one employee to roll partition into place and lock the casters to prevent movement.
- Clear panel will not obstruct lines of sight.
- Easy to store when not in use
- Opaque panel options for privacy
