FABBACK Marine Grade Acrylic Mirror

Marine Grade Acrylic Mirror is a superior quality, premium grade of FABBACK acrylic mirror sheet. This shatter-resistant mirror is heavily used in boat/yacht cabin areas. Marine Grade Mirror Sheet is double inspected throughout each manufacturing process to ensure maximum quality standards.

Marine Grade acrylic is available in .118" (3mm) and .236" (6mm), 4' x 8' with paper masking on two sides, with an optional abrasion resistant coating. For custom sizes, thicknesses and protective masking, call for availability.

Available Color: Clear

FABBACK® mirrored acrylic sheet features the industry's toughest protective back-coating. The durability of this sheet makes it virtually scratch-resistant during fabrication.

Advantages of Acrylic Mirror

Reflectivity: Approximately 85-90% over the 400-700 nanometer visual light spectrum.

Lightweight: Less than one half the weight of glass in the same size and thickness.

Break Resistance: Can be ten times more break resistant and has seventeen times greater impact resistance than glass of equal thickness.

Heat: Will tolerate continuous service up to 160°F, and can withstand occasional short-term exposure up to 190°F.

Easy Fabrication: Various shapes and sizes can be obtained by cutting with conventional power saws and routers, using the proper blades and cutters. Mirrored acrylic can be cold bent for curved shapes or strip heated for a sharp bend. State-of-the-art laser systems can produce accurate, complex designs.

Economical: Low fabrication and installation costs.

Quality: Highly reflective surfaces.

Call TPI for samples, available sizes and thicknesses.
