

American Louver Company® Paracube II

The Paracube II louver offered in both traditional and ESP configuration is a versatile louver offering both glare control and higher light output while maintaining a visually pleasing and comfortable environment. The larger cell design provides higher efficiency and makes the Paracube II excellent for retail environments, high ceiling and other lighting applications where more light is desirable. The Paracube II is also ideal for office settings with greater spacing between fixtures.

- Provides more light along with controlled brightness
- Good glare control
- Luminaire Efficiency to 57.1%
- Coefficient of Utilization to .63
- Visual Comfort Probability to 94
- Molded in acrylic or polystyrene material
- Comes standard with UltraLux protective finish
- Silver metalized finish is standard on all products. Gold, white and black finishes are also available
