

American Louver Company® Vinyl Louver

This vinyl louver is a grid style diffuser manufactured from favorable fire and building code rated, translucent white PVC material. The vinyl material is a Class 1 material, approved for use by strict building code authorities and has an excellent rating in Fire Hazard Tests. The vinyl louvers and multi-celled, vacuum-formed “sandwich” panels whose design results in a strong, lightweight panel, free from sagging. These high efficiency, lightweight, safe and attractive louvers are ideal for luminous ceiling applications, especially where code requires the use of non-flame spread products.

The perforated or “open-cell” louvers are ideal where HVAC, intercom and sprinkler systems are to be installed above the louvers. The unperforated or “closed-cell” grilles are excellent in applications where you wish to conceal internal hardware, electrical work and unfinished areas from view. The closed-cell louvers are great for elevators, awnings, sign display and exhibits. Both style Vinyl Louver products are durable and easily maintained and also ideal in outdoor applications.

- Destaticized to prevent dust attraction
- Easily maintained by periodic washing in mild detergent
- CLASS 1 Material, approved for use by strict Building Code Authorities
- “EXCELLENT” rating in Fire Hazard Test results
- Louvers are available in 2' x 2', 2' x 3' or 2' x 4' and may be used in any standard grid suspension system. Special cut sizes are also available
